

WELD SEAM GRINDER & PIPE SANDER

Electric or Air

Removes welds and polishes pipe

LBR 1506 with grinding belt

Electric or Pneumatic

LBR 1506 Accessories

Abrasive Grinding Belt (10/pack)

For grinding and surface structuring – Aluminum Zirconia

- 24" x 1-5/8", 36 grit [223.670](#)
- 24" x 1-5/8", 60 grit [223.689](#)
- 24" x 1-5/8", 120 grit [266.132](#)
- 24" x 1-5/8", 240 grit [250.610](#)

Abrasive Polishing Belt (3/pack)

For polishing and cleaning – Nonwoven abrasive

- 24" x 1-5/8", Coarse [250.586](#)
- 24" x 1-5/8", Medium [250.587](#)
- 24" x 1-5/8", Fine [250.588](#)

The LBR 1506 is a combination grinder and pipe belt sander. The front hard rubber contact roller drives the abrasive belt to grind flat surfaces. It removes weld seams in a straight line, without leaving edges or a wavy finish.

For sanding pipes or handrails, it is a flexible tool. The sanding belt follows every contour to grind and polish up to a high-gloss finish. The belt wraps around the pipe and requires only a few steps to polish the entire circumference. It is ideal for stainless steel, aluminum and high-quality metals.

- For sanding pipes from 3/8" to 10" diameter
- Grinds weld seams on flat surfaces – leaves no edges
- Powerful 11 Amp motor and variable-speed control from 33 to 100 ft./sec.
- Quick and easy tool-free changing of sanding belts
- Ideal for stainless steel and aluminum

LBR 1506 Specifications

	Electric (LBR 1506 VR)	Pneumatic (LBR 1506 AIR)
Belt size (L x W)	24-1/3" x 1-5/8"*	
Belt speed	33 - 100 ft./sec.	
Power	11 Amp/1200 Watts	33 CFM @ 90 PSI
Pipe ø max.	10"	10"
Weight	11.25 lbs.	9 lbs.

* Note: Exact belt size is 618mm x 40mm

Standard Equipment

- 1 side handle - [Part No. 252.721](#)
- 1 spade-grip handle - [259.290](#)
- 1 sanding belt set, grits 60/120/240 - [1 set](#)
- 1 polishing fleece 1-5/8" x 24" (medium) - [250.587](#)
- 1 hex head wrench 5mm - [115.460](#)
- 1 hex head wrench 6mm - [104.167](#)
