

DS 3011 Planetary Sander/Polisher

Sands, grinds, hones and polishes.

- Built-in dust extraction
- Triple-sealed bearings
- High torque

The DS 3011 planetary polisher produces a flat, swirl-free finish on counter tops, floors, walls and steps. The unit will grind, hone, polish and clean concrete, terrazzo, marble, granite and corian surfaces using coated abrasives, diamond polishing systems and lightweight diamond wheels. The system operates wet by default, or dry with an optional dust cowl.

This is a true planetary-driven tool. The 12" platform turns at a lower rate than the higher rotational speed of the 5" platens. This combination of RPM provides the optimal speed for polishing, producing a perfect finish 5x faster than a single-head polisher. A center coolant feed, precision bearings and sturdy construction make this the ultimate tool for perfect finishes and superior polish.
